TECHNICAL CATALOG

BALCONY GLAZING SYSTEM WITH 10 BEARINGS

TECHNICAL SPECS

MAXIMUM HEIGHT	: 3000 MM	HAULER BEARING	: 6
PROFILE THICKNESS	: 3,04 MM	GUIDING BEARING	: 4
BEARING DIAMETER	: 38 MM	TOTAL ALUMINIUM WEIGHT	: 8 KG/MT

GENERAL HINTS

- Guiding channel** : In order to avoid leaning out of the leaf of system, hinge guides have channels over the body to stop enlargement of the main profile .
- Profile - glass fixing** : Each glass have three holes at its up and three holes at its bottom which has totally six holes over the body. Profiles to be screwed from glass, never use of silicon to fix the profiles to glasses.
- Lock system** : Aluminium bodies plated with chrome. System cannot open by forcing. Children lock exists.
- Carrier bearings** : Plated with plastic to avoid corrosion.
- Official registration** : System patented. Patent no. Pct/tr2007/000064
- Available side plastic caps with angle** : +90, -90, +115, +135, -135, +150, -150, +170, -170 degrees

OUR MISSION...

Zonex's mission is without compromising from the quality, adding asset to human sources, advertising it's own production of curtain integrated balcony glazing systems and to prove Turkish goods long term strength to the world.

**OUR MISION...**

Taking consideration of the life quality and aesthetic in the metropolis, our vision is to advertise The technolgy of curtain integrated balcony glazing system which the design belongs to us.

CURTAIN INTEGRATED BALCONY GLAZING

This invention is a movable glass system with self curtain placed such as balconies, shops and shop windows, said glass system being capable of sliding on profile rails located on the floor or the top ceiling and of rotating and folding owing to a wheel mechanism , said glass system having a curtain mechanism inside the upper leaf profile , wherein the curtain mechanism is able to move together with the glass and to be opened and closed together, when desired, and wherein there is no need to install a separate curtain in the section covered with glass.

THIS INVENTION IS BEING PLACED IN THE FIELD OF CONSTRUCTION, ARCHITECTURE AND MANUFACTURING. THIS INVENTION'S PATENT BELONGS TO ZONEX

ALL RIGHTS RESERVED AGAINST OF COPYING OR MODIFYING ZONEX SYSTEM.
